News Notes

Born—To Mr. and Mrs. Art Jensen, at the Community hospital, a son. Dr. Astrof in attendance.

Mr. and Mrs. Thos. Allen and children returned from Wetaskiwin last Sunday by auto. Tom is back to his old position on the Merc. staff.

Born—To Mr. and Mrs. Stanley Jones, last Saturday, a daughter.

Chas. Strong is making a nice job of the new brick office for the Knight Sugar company. The brick fireplace chimney on the new Meldrum house is another fine piece of work which must be credited to Mr. Strong.

Strathmore Standard: "The inevitable has happened in the matter of increased telephone rates which became effective in Alberta on October 1st. The members of the Public Utilities Commission have listened to the arguments for and against an increase and have decided in favor of the proposed increase without making a single reduction from the schedule presented. The officials of the telephone system must have marshalled their facts well, in order to secure this result, which was not obtained without meeting the keenest opposition. It has been generally known for some time that a very serious shortage was being created in connection with caring for the plant depreciation and it will be a very satisfactory condition to know that with the increase in rates, which are not burdensome to anyone, that all these charges will be properly provided. In the past a splendid service has been given, through the co-operation of a competent and courteous staff. Just think of the service you have been having for a trilling sum per month, which has been increased only fifty cents per month."

Town treasurer O. H. Snow returned last Friday from attending the Salt Lake conference.

Special Dance—On Halloween Saturday, Oct. 30, Opera House. Decorations. Premier Orchestra will furnish the music. Tickets \$1.00. Extra lady 25c.

The Dempsey-Tunney fight pictures will be shown at the Rex Theatre tonight and Saturday. "Classified" with Corinne Griffith will also be shown. There will be two shows each night and a special matinee Saturday at 12 noon for patrons who are on night shift at the sugar factory.

Factory officials announce that next year farmers will receive \$7 plus subsequent payments for their beets per ton. This year they are receiving \$5.75 plus subsequent payments, which, due to the splendid sugar content, will total probably \$7.00.

RIGHT

"What do you think of crossword puzzles?"
"Words fail me!"

Dowager Lady Kumber (to new maid): Don't forget, Jane, that we are usually referred to as the "Richmond" Kumbers, to distinguish us—
Jane: "I know, mum—from the 'Kew' Kumbers."

WELL OFF

"This bottle of milk you sold me is sour!" said the customer.
"Come, come," said the grocer, soothingly, "you have one bottle of it and I have 18."

DOING YOUR PART?

Are you doing your part in assisting the teaching staff of the public and high schools in getting the best results? Many parents willingly pass to the teachers almost all of the work in the education of their children. Never by any possible chance do they attempt to assist the children with their school work, and worse still in some cases actually criticize the teachers in the presence of the pupils, thereby decreasing the influence of the teacher.

Often the parents fail to impress upon the children the importance of making the most of every school day, failing to recognize the fact that time wasted in school years will never return, and that the child will suffer from the handicap to the end of its career. Assist the teachers.

FALL PURCHASING

Local merchants are announcing the arrival of fall and winter goods.

The season has been opened up by merchandise displays that should appeal to all shoppers, giving them an opportunity to choose from stocks that have been selected from the standpoint of quality and service.

Everyone should endeavor to give the home merchants an opportunity to secure this business. They are the only dealers who help build up the town by paying taxes and by contributing to everything that helps to make Raymond attractive to you and a fit and proper place to educate and rear your children.

One rotten apple can spoil a whole barrel, and one chronic knocker can keep a whole town stirred up.

The Law of the Monks

Whenever we hear a newcomer assuring our town and mode of being we are reminded of the following rule of an ancient monastery:

If any pilgrim monk come from distant parts, if with wish as a guest to dwell in the monastery, and will be content with the customs which he finds in the place, and do not perchance by his lavishness disturb the monastery, but is simply content with what he finds, he shall be received, for as long a time as he desires. If, indeed, he find fault with anything, or expose it, reasonably, and with the humility of charity, the Abbot shall discuss it prudently, lest perchance God had sent him for this very thing. But, if he have been found gossiping and contumacious in the time of his sojourn as guest, not only ought he not to be joined to the body of the monastery, but also it shall be said to him, honestly, that he must depart. If he does not go, let two stout monks, in the name of God, explain the matter to him.

NOT LOST

Jack: "So Bill is engaged."
Dick: "Yes, another good scout lost."
Jack: "Oh no, simply Miss placed."

TRUTH WILL OUT

"Did you take your cold bath this morning?"
"No. There wasn't any hot water."—Keith's

A WISE FATHER

"Pa," said young Bill, "What's a golf hazard?"
And his wise parent replied: "Some of the stuff that's handed around in the locker-rooms, son."

BAD NEWS

Mike was working diligently on his potato patch when he saw the postman coming up the road bearing for him a black-edged envelope.
Mike became uneasy, and showed it.
"Hope it's not bad news," said the postman.
"It is that," said Mike, glancing at the address. "It's upset Ol' am entirely. Me brother Ol' is dead. Ol' can tell by his handwriting!"

TOO MUCH OF A GOOD THING

"I tell you," said the real estate agent, "there isn't a finer residence anywhere than this. Just look at the wonderful scenery!"
"The scenery is all right," replied the home searcher. "The only trouble is, there is too much."

"Paw, where does ink come from?"
"From incubators, son. Now run out with the boys."—Okla. Whirlwind.

Gentleman (sampling liquor): "I'll bet somebody changed the bottle on this label!"

"is good tea" TEA

You've been intending to try Red Rose sometime. Why not now?

Growth Of Wheat Pool Movement

The farmers of Western Canada in less than three years, have established the largest co-operative organization of its kind in the world. The Canadian Wheat Pool, with its three units in the provinces of Manitoba, Saskatchewan and Alberta, now has a total membership of 125,000 farmers, who control 13,230,000 of the 21,000,000 acres sown to wheat last year in the three prairie provinces. It is handling the sale of the greater part of the wheat production of Canada, and Canada already exports more wheat than any country in the world.

The first of the three wheat pools commenced business in the province of Alberta in October, 1923, and at the close of the first pool year on July 15, 1924, had handled 31,500,000 bushels of wheat shipped by its members.

Meanwhile Manitoba and Saskatchewan were organizing pools. In the fall of 1924, they had perfected provincial organizations and the three provinces then merged their selling strength into one giant marketing organization, known as "The Canadian Co-operative Wheat Producers, Limited." This agency is incorporated under a Federal charter, with very wide powers. Its function is to take delivery of the wheat from each of the respective provincial pools and to place it on the markets of the world in such a manner as to secure a price commensurate with the natural law of supply and demand. Each of the three provincial pools is responsible for gathering the wheat of its own members and placing it at the disposal of the central selling agency, which is controlled by a board of nine directors composed of the president, vice-president and one director of each provincial pool.

The largest proportion of the wheat is sold by the selling agency to importers and buyers in different countries of the world, for the agency has direct selling connections with every wheat importing country and its own representatives in 51 parts of the world. The funds which accrue from the sales are disbursed to the members of the three pools. This method of handling wheat provides a large volume through one agency and reduces the cost of operation to a minimum.

It is difficult, if not impossible, to estimate in dollars and cents the actual increase in the price of wheat attributable to the operations of the wheat pool, but the Pool, controlling as it does over 50 per cent of Canada's exportable surplus, has the opportunity of preventing large volumes of wheat from being rushed on to the market and creating a glut which inevitably forces prices down. The strength of the Pool lies in its stabilizing power and in its facilities for selling in great quantities and in all countries.

This vast co-operative organization of farmers grew out of the experience of fixed prices for wheat established by the Canadian Government during the war, regulated by an official body known as the Wheat Board. Immediately after the war the farmers of Western Canada urged the Government to maintain the Wheat Board, but as it had been brought into being and had functioned under a War Measure Act, the machinery for its maintenance automatically passed out of existence with the signing of the Peace Treaty. The wheat producers of the Canadian West, learning that the Wheat Board could not continue, began to realize the necessity of an organization of their own to handle the marketing of their wheat in a way that would prevent a too wide fluctuation and secure a better stabilization of prices.

Through the Pool the wheat is handled at cost and therefore at a saving to the farmer. The Central Selling Agency with its direct connections is able to eliminate some of the handling charges between producers and consumer that are incidental under any other method of marketing. Moreover, the Pool relieves the farmer of the necessity of guessing the right time to sell his grain and assures him of the average price for the year on all wheat it sells. This orderly marketing avoids the disastrous effects of the flooding of the market in the fall which prevailed under the old system.

The Wheat Pool in Western Canada is a notable example of the advancement made by the farmers of this stage. Already it has shown the possibilities and advantages of co-operative marketing. Under the old system the farmer sold his wheat and took what the market offered. In the Pool system he delivers his grain when convenient and obtains the average price of the selling period, together with the saving in the handling costs. The Pool price to every member is the price at Fort William, less handling charges and freight charges. The latter, of course, vary, according to the length of the haul.

With the development of Canada's agricultural areas, only one-fifth of which are as yet under cultivation, the growth of the Canadian Wheat Pool may reach a magnitude never before conceived in co-operative marketing.

Farm Settlers From U.S.

Active movement of farm settlers from the United States to Canada continues, according to the department of immigration and colonization. Eighteen offices are maintained in the United States and all report increases for the month of August, with the agency at Fargo, N.D., heading the list with 272 farmers, who, with wives and children make a total population of 322. They brought with them to Canada cash and effects valued at \$145,355.

Mr. Everest, in the Himalayas, is 29,002 feet above sea level.

Scheme Did Not Work

A man entered the vestibule of a local hotel and placed his umbrella in the stand, but before going upstairs he tied to the umbrella a card on which he had written: "N.B.—This umbrella belongs to a champion boxer. Back in ten minutes."

In twenty minutes he returned, but the umbrella was gone. The card, however, was still there, and on it someone had written: "P.S.—Umbrella taken by a champion long distance runner. Won't be back at all."

Italy manufactures a third of the artificial silk now produced in the world.

Germany Now Thinks War Is Calamitous

International Strife Is Insanity on a Wholesale Scale

It was the fashion, only a few years ago, to glorify war and to create in the minds of young men an impression of its necessity. Germany was particularly eager to give its youth a strong martial spirit and to hold before them military ideals. If Stresemann speaks for his countrymen—and there is no reason to doubt that he does—the Germans have had a complete change of heart. The appalling sacrifices of the war have taught them, as they have taught other nations, that war is not glorious, but always calamitous. International warfare is insanity on the wholesale scale. It is of course, natural and right that young men should go to the defense of their country when it is threatened; it is noble to lay down one's life in a just patriotic cause. But if wars can be prevented as they can, if the proper state of mind is cultivated, it is the duty of every young person to help the movement along.

RHEUMATIC SUFFERERS

May Obtain Relief by Enriching the Blood Through the Use of Dr. Williams' Pink Pills.

In the days of our grandfathers rheumatism was thought to be the unavoidable penalty of middle life and old age. Almost every elderly person had rheumatism, as well as many young people. It was thought that rheumatism was due to exposure to cold and dampness, and it was treated with blisters and hot applications which sometimes gave temporary relief but did not remove the trouble. In those days there were many rheumatic cripples. Now medical science understands that rheumatism is a disease of the blood and that with good blood any man or woman of any age can defy rheumatism. There are now many elderly people who have never felt a twinge of rheumatism, because they have kept their blood in good condition, and there are many who have conquered it by building up their weak, watery blood. The blood-enriching qualities of Dr. Williams' Pink Pills is becoming every year more widely known and the more general use of these pills has robbed rheumatism of its terrors. At the first sign of thin, impure blood purify yourself against the ravages of disease by taking Dr. Williams' Pink Pills. They have helped thousands—if you give them a fair trial they will not disappoint you. Their value in the case of rheumatism is proved by the statement of Mr. Phylax Beaton, Blackstone, N.S., who says:—"I feel it a duty to tell you of the wonderful benefit I derived from the use of Dr. Williams' Pink Pills. I suffered untold agony from rheumatism and a run-down condition. The trouble left me incapable of work of any kind, and for a part of the time I was unable to move without the assistance of a cane. I took different medicine from doctors, and also other remedies that were recommended, but did not improve and had about given up hope of getting better when a friend advised me to try Dr. Williams' Pink Pills. I did this with the result that within four months I was as well a man as ever I had been. I can say that I was a complete wreck when I began using Dr. Williams' Pink Pills and that this medicine completely built up my health. This was some years ago, and I have no return of the trouble since. I give this statement hoping it will benefit others."

You can get these pills from any medicine dealer or by mail at 50c. a box from "The Dr. Williams' Medicine Co., Brockville, Ont."

Aged Farmer Is Killed

Was Owner of 52 Quarter Sections in Saskatchewan

Death came instantaneously to Stanley Clark, wealthy aged farmer of the Froude district, when his automobile was struck by an engine. The late Mr. Clark was 70 years old, and was owner of 52 quarter-sections in Saskatchewan. The newspaper reports record the fact that the deceased had been a recluse since 1904, and "during all that time he had lived alone." It should also be written into the record, that the late Mr. Clark was a valued and respected member of the Wheat Pool, having signed a contract on the 29th of August, 1923, his number being 65-030.

Nineteen Trans-Atlantic Cables
The nineteenth trans-Atlantic cable is now operating, and the twentieth will doubtless be needed, notwithstanding the advance in wireless communication across the seas—from the Boston Transcript.

Women in Ainu, Northern Japan, admire bearded faces so much that they tattoo their own to make them appear whiskered.

Keep Minard's Liniment in the house.

Wins Scholarship

Jean Claude Lessard, who has been food controller at the Chateau Lake Louise for the past summer has been awarded a scholarship at Harvard University by the Province of Quebec Government. Mr. Lessard has had a particularly brilliant career at McGill University during the past two years. He will continue his study of railway economics at Harvard.

Mr. Lessard also held the position of food controller at the Canadian Pacific Hotel Algonquin in St. Andrews, N.B., for three years. He is not yet twenty-two years old.

Strange New Pygmies Found

Scientists say New Guinea Bush Men Were Friendly

In dense mountain jungles never before successfully penetrated by white men, the Dutch New Guinea expedition of American and Dutch scientists has discovered an entirely new group of pygmies. Details of the discovery have been received from the Associated Press correspondent accompanying the expedition. The dispatch was carried by a bush runner.

Entering a country in which previous expeditions had been decimated through fever and hardships, the scientists, after four months of travel, came upon the strange small people living in quiet and secluded lives, hemmed in by jagged jungles, covered mountains and cut off from the rest of the Papuan tribes.

Matthew W. Stirling, of Berkeley, Calif., one of the leaders of the expedition, described the bush men as unusually friendly.

The pygmies, he said, talked in undertones or whispers and seemed afraid of being too obtrusive. They were not timid, but quite intelligent and always cool and collected.

"The first thing they did was to give us all a present. The presents consisted of their small bows and arrows, arm bracelets, bananas and betel nuts.

"They raise tobacco, sweet potatoes, bananas and pigs. They brought us a pig and all gathered around to make a ceremony of killing it."

A Wonderful Discovery

Swiss Scientists Find Group of Radio-Active Stars

Two Swiss scientists, Doctors Kolvorser and Decsalis, who have been living in a tent for the last month on the summit of Monch mountain, Geneva, at an altitude of 13,466 feet, making astronomical observations, have made a remarkable scientific discovery. They say they found that a certain group of stars send out extraordinary rays of light whose radio active force is far stronger than roentgen rays. The scientists hope to capture and employ these rays for a scientific medical purpose. The scientists, owing to the cold weather, were obliged to interrupt their investigations and have descended to Interlaken.

Farmers Have Received

Patronage Refund

Saskatchewan Farmers Benefit by Pool Elevator Shipments

The distribution of \$476,614 as a patronage refund to the farmers who utilized Pool Elevator facilities in Saskatchewan last crop year, will be welcome news. It represents 2 cents per bushel on all grades of wheat shipped through the 59 houses of Sask. Pool Elevators Ltd., last season, and 1 cent per bushel on coarse grains. 1 1/2 cents per bushel will be refunded on platform wheat shipments to pool terminals; and 1/2 cent per bushel on coarse grains so shipped. Last year's handling charge on wheat being 4 cents, the refund will reduce same to a two cent rate.

The man who tells you that he has nothing to say is usually capable of saying a good deal if he were so inclined.

The smallest island owned by the United States is Samoa, with an area of 77 square miles.

For all pains—Minard's Liniment.

Claimed By Ireland

British National Anthem and "Yankee Doodle" old Irish Tunes

"Yankee Doodle" is not American at all—it's Irish, according to Dr. Gratian Flood, an Irish authority on musical history. He asserts that "Yankee Doodle" was originally an Irish air known as "All the Way to Galway." "God Save the King," the British national anthem, Dr. Flood says, also is an old Irish tune which originated about 1595 and has been going strong ever since.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Gave Away A Fortune

Man Who Inherited a Million Dollars Disburses Amount in Four Years

It has taken Charles Garland, inheritor of a million dollar fortune, four years of earnest effort to give it away. But he has succeeded at last. His large corps of distributors, known as trustees of the American Fund for Public Service, Inc., have officially announced their triumph and the figures show that only a paltry \$14,000 ungiven or unpledged, is left. The news comes as a sad blow to many causes and movements that had hoped to get through their teething period on a part of the Garland trust fund.

The best known issue of "baby stamps" was begun Oct. 1, 1889, bearing the first baby portrait of King Alfonso XIII.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Steel phonograph needles that will play from 400 to 600 records without changing, are now made by a Missouri concern.

Storms On The Sun

Many Rapid Changes Taking Place Says Chicago Professor

Violent storms are raging on the sun as well as on earth at present, says Professor E. B. Frost, director of Yerkes observatory of Chicago. Gigantic sunspots, visible to the naked eye through smoked glasses, give proof of the upheaval on the faraway planet he said.

Magnetic storms and northern lights may result from the distant storms, although no serious results will follow, the professor explained.

"The disturbance is in a solar latitude 23 degrees north, coming around the east side of the sun. Many photographs have been taken and very rapid changes are taking place," Professor Frost said.

Sunspots are not generally visible to the naked eye, he explained, unless group over vast areas.

Tourists Visit Yoho Valley

More than 30,000 persons saw the Yoho Valley, near Field, B.C., by auto this year, travelling over the Federal Government road which was opened early in the summer. This is regarded as one of the wonder spots of America.

Doctors Use It.

They recommend it also for sprains, bruises and other ills.

Many Join Wheat Pool

A total of 51,642½ acres of non-pool grain in Saskatchewan was won for orderly marketing by the operators and superintendents of Sask. Pool Elevators, Ltd. from September 12th to 20th—approximately 10,000 acres every twenty-four hours.

Building Auto Highways

For the development of local industries, as well as for military purposes, the Home Department plans the construction of more than 2,000 miles of automobile roads in Hokkaido, Tokio, Kyoto, Osaka and other prefectures.

Children Cry for

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocyclic-acidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Mapping Spread Of Trees In The Prairie Provinces To Ascertain Rate Of Growth

Mapping the spread of trees in the prairie provinces with the object of ascertaining the rate at which they spread goes on, is one of the latest activities in which Prof. V. W. Jackson, of the Manitoba Agricultural College, and other authorities on arboriculture, are engaged.

The mapping is being done in connection with a systematic campaign to have more of the prairie covered with trees than is at present the case and yet in no way interfere with agricultural development. With the exception of comparatively narrow strips of land along the banks of rivers, streams and lakes, the prairies were treeless up to the last century, according to Prof. Jackson, who in a statement quoted in *LaVerandrye*, the first white man to explore western Canada, as expressing his surprise at the lack of foliage on the prairies proper whereas some of the districts through which *LaVerandrye* passed are now practically covered with trees.

So far, the spread of the poplar has been the most remarkable to be noted, according to Prof. Jackson. All through Saskatchewan "poplar islands" are forming and increasing in size, and it appears that the poplar spreads all the more rapidly as new land is broken for agricultural purposes. It is only a matter of a few generations until there will be no such thing as a treeless stretch or prairie of any great extent, Prof. Jackson states.

While the poplar is easily first in the way it adapts itself to the conditions of the prairie, satisfactory results are being obtained with oak and elm. Acorns, which have been sent to Beaver Lodge, Alta., and Red Deer, Alta., have germinated and the saplings give promise of developing into lovely trees. Elm seeds which have also been planted in Alberta have likewise germinated, and as in the case of the oaks, the progress of the elm saplings is being closely watched.

Healthy Livestock

In Saskatchewan

Work in Connection With Tuberculosis Test Shows Few Reactors

The first test in the area for the eradication of bovine tuberculosis in the six rural municipalities east of Lohr Lake, Saskatchewan, has recently been completed. This work was conducted by the Dominion Department of Agriculture and some assistance was given by the Provincial Government and the rural municipalities. In all 21,284 head of cattle were tested and only 176 reacted, or less than one per cent—82 per cent to be exact. This shows that Saskatchewan live stock are in a very healthy condition, and it is hoped that farmers in the restricted area will endeavor to improve the quality of their stocks by making it a pure herd sire area as well.

Effeminate Youth

Chicago Doctor Says Thymus Glands Responsible For Vagaries of Present Generation

The trouble with the "effeminate youth and manly flappers" of the present generation is that their thymus glands have continued to operate after their development from childhood, Dr. Victor H. Lindlahr, of Chicago, told the Ontario Druggists' Association in annual meeting here at Toronto. Dr. Lindlahr said the fact that the thymus glands were operating beyond their proper period was due to the softness and luxury which the march of science and civilization entailed in the lives of the average person of 1926.

Surprised When He Saw Canada

Mr. Alfred Bishop, who came to Alberta from the United States, has written back some of his impressions of the country to Mr. G. G. Rutledge, Canadian Government Agent, at 301 E. Genesee street, Syracuse, New York. Says Mr. Bishop: "I am going to tell you what I think of the Canadian West. I was surprised when I saw the amount of wheat grown in Canada. This country is the land of opportunity—and there is plenty of it."

Had To Be Careful

The wife of a dying man sent out for a preacher to come to the bedside of her husband, who was no better than he should have been. The preacher came and said, "You had better renounce the devil, my friend."

"Renounce the devil?" exclaimed the dying man. "Why I am not in the position to make any enemies now."

—The Outlook.

History Rich With Myths

Many Famous People Believed Clever After They're Dead

Strange stories concerning the reappearance of famous people after their death provide an interesting number of myths that refuse to perish. Just as Lord Kitchener was supposed to be alive in Germany during the war, so the late General Hector MacDonnald was credited with existence after his death.

Soon after the untimely end of this popular soldier, who rose from the ranks, a rumor said he was a "Chinese General" drilling troops for the late Dowager Empress. The myth gathered strength as the years went by, until a returned traveler from Peking wrote of the "lonely palace of jade" where he has seen the British general dressed as a Chinaman, revered by all. It lives to this day.

Wellington's gigantic funeral was not sufficient to bring conviction as to his death.

For many years afterwards a rumor credited him with being "kept a prisoner" in Apsley House. Many visitors to the Metropolis could peer wonderingly at the imposing exterior of the mansion in the hope of catching a glimpse of the captive "Iron Duke."

It was but natural that the butchery of the Czar and his family should breed legends of a marvellous character. Just as "the Czar's youngest daughter" is reported alive in various parts of Europe, so there are hundreds of thousands of Russians who credit the myth that the late Czar is living as a peasant monk, devoting himself to charitable deeds.

It is but a few months ago that a story appeared in several newspapers in Russia reporting that a monk appeared in Moscow. After showing kindness to a poor Jew, he is reported to have revealed himself as "the who was once called 'Czar.'"

History is rich with myths and marvels that defy time.

Discover Missing Link

Complete Skull of Ape-Like Creature Is Found in Java

British anthropologists were thrilled by a despatch from Batavia, Java, which said Professor Humberlein of the Netherlands Government Medical Service has discovered at Trinil, in Central Java, a complete skull of the prehistoric ape-like creature termed by the lady the "Missing Link," and by science *Pithecanthropus erectus*. The despatch said the skull was found at the same place where Professor Eugene Dubois, of Amsterdam University, discovered in 1892 the upper part of a skull, two teeth and a thigh bone from which was reconstructed the previously unknown ape-like human being designated as the "Missing Link."

Professor Humberlein's specimen which the despatch said is complete and sound, will be kept in Dutch East India, as exportation of such relics is prohibited.

Miss Mildred Tildesley, who has catalogued more than 6,000 skulls at the Royal College of Surgeons, believes if the reported discovery is true it is the most important in years.

Dr. Dubois' famous discovery was made on the left bank of the Bengawan River near Trinil. Much discussion followed with many authorities opposing Dr. Dubois' theory. The creature was not held to bridge the entire gulf between man and the ape, but some scientists argued it constituted a further piece of evidence in that direction.

Needlessly Alarmed

British newspapers are considering the condition of Canadian newspapers, which they fear are becoming more and more Americanized, and are wondering what they can do about it. They are needlessly alarmed. Canadian newspapers may be American in appearance and to some extent in methods and news, but in heart they are far from American. They are nearer British in ideals than they are American. —Calgary Albertan.

Looks Like Over-Production

President Angell, of Yale, said at a New Haven tea:

"The books in the Yale library double in number every 20 years. They total now 1,390,000. Every year 50,000 new books are added, that many old books being stored away to make room for them. Books, books, books! Of course," he added, "all is not literature that litters."

Be careful to wash your face and hands thoroughly — I'm expecting your Aunt!

But suppose she doesn't come?

Making Use Of Nature

Invention Has Made Gas-Buoys And Lighthouses Automatic

An invention of which landmen know little, yet which saves their pockets in the time of tens of thousands yearly, is the so-called sun valve by means of which gas buoys and lighthouses are rendered automatic.

Inside a gas buoy can be stored enough acetylene gas to burn for six months if the light can be turned down in the daytime. To do this work by hand would mean the employment of hundreds of men and launches, and would often be impossible owing to bad weather. But by means of the sun valve the sun is made to do the work. As day breaks the action of the light on a certain substance causes the tap to be turned so that the acetylene flame burns low. When twilight comes again the diminished daylight causes the flame to rise again, so that gas is only being consumed during the hours of darkness. Even a heavy fog causes the light to burn up brightly.

There is also an electric-light buoy of which the light is generated by a mechanism worked solely by wave action. This gives a more powerful light than the gas buoy, and, once installed, goes on working indefinitely. Inside is a turbine driven by a stream of water lung by a pump, and this pump is worked entirely by the rise and fall of the buoy on the waves. Even a gentle swell will do the trick. The turbine runs the dynamo and the dynamo produces the light.

Busy Bees In Manitoba

Big Increase In Honey Production Reported This Year

Manitoba reports a big increase in honey production for the sixth year in succession. Honey production for many years has been a profitable industry in eastern Canada, but it was really only about six years ago that the honey crop in Manitoba began to be important. It has increased during the last five years from 503,000 pounds in 1920 to 1,107,000 pounds, valued at \$616,068.00 in 1925. This tremendous increase in output has effectively proved that Manitoba's climate is well suited for the production of honey. This year the production will be even greater than last.

Advance of Japanese Women

Japan has its Council of Women, and at the recent annual meeting the Empress of Japan attended in person and read the opening address. She was supported by one of the princesses, as president. At this meeting, which was held in a gaily decorated building in which the national colors were much in evidence, the Imperial ladies discarded their national costume for European dress.

Parker: "Why do you call Robinson 'Skipper'?" He was a sea captain in his younger days, eh?"

Stanfield: "No. He was an embezzling bank cashier."

Disease-Free Potato Seed

Efforts to Produce Seed Potatoes Free From Disease

Efforts made by the Dominion Experimental Farms and Stations to bring about seed potatoes immune to disease have at least been partially successful. Five years ago the Garnet Chili, imported by Bermuda from this country was found unsatisfactory because of leaf-roll disease present in the seed stock. An attempt at rejuvenation was not found satisfactory and was discontinued. Hill-selection has, however, resulted in the production of plots of vigorous seed from which diseased and weak plants have been eliminated and which have given thirty per cent increased yield over unselected stock, says Mr. W. K. McCulloch, district inspector. In his report to the Dominion Botanist, a steady improvement has taken place in the Garnet Chili stock as a whole, and in 1925 the Director of Agriculture for Bermuda reported the seed as being the "best ever imported." A start has also been made to isolate disease-free, high yielding, pure lines of Irish Cobbler, Green Mountain, Bliss Triumph and Garnet Chili varieties. The majority of selected units, reports Mr. McCulloch, have retained their disease-free character for two seasons and it is hoped in time to have a disease-free nucleus of many of the popular varieties.

Shipping Buffalo To North

Movement of 2,000 Buffalo of Wainwright Head Is Proceeding

As previously announced, the Department of the Interior is sending another shipment of buffalo from the Buffalo National park at Wainwright, Alberta, to the Wood Buffalo park near Fort Smith, Northwest Territories. This is the second movement to be made from the herd of 8,000 at Wainwright, the former having been made last year when 1,621 young animals were shipped, approximately 700 miles north to their new home on the Peace river.

The first of this year's shipments was made from Wainwright on June 29 routed by rail to Waterways, Alberta, and thence by scow to a point on the Slave river a little south of Fitzgerald. This landing place is a considerable distance north of the one used last year and was selected owing to the superior facilities offered for the landing of the buffalo.

Since June 29 shipments have gone forward at the rate of 200 to 250 animals per week and will be continued until the whole consignment of approximately 2,000 buffalo has been transferred.

Black Bass In Alberta Lakes

Large mouthed black bass may soon be available to Alberta sportsmen for a batch of fingerlings and yearlings from the Kootenay lakes have been placed in Lac La Poudre by the Northern Alberta Fish and Game Protective Association.

Mythical Figure Of John Bull Is Linked Up With The History Of The British Empire

German Invents New Rifle

Compressed Air as Motive Power Eliminates Roar of Discharge

The next war will be carried on without the proverbial cannon's roar and the rattle of musketry and machine guns, if a Berlin locksmith, Hermann Pleth, is able to apply to larger caliber weapons the principles which have been successful with small caliber rifles. Using compressed air as motive power his new gun drives projectiles through three millimeters of steel at a distance of 2,000 meters, and the report scarcely is able to be heard by observers, according to the *Acht Uhr*, which states tests were conducted in the presence of Reichswehr officers.

The new rifle has the additional advantage of carrying 25 shots without reloading and can be fired automatically.

Pleth maintains the strictest secrecy concerning his method of compressing the air, and how it is possible to control the pressure so that the 25 projectiles are given uniform velocity. He has offered his invention to the German Government for \$1,500,000, but says he will destroy it before allowing another country to obtain the secret. The inventor claims the same principles can also be applied successfully to large weapons.

Cement Friendship

In Unique Manner

Ontario and New York State Farmers Hold Plowing Match

Of all the things that have been done to signalize the long years of friendship between Canada and the United States, the most unique will be the international plowing match on the old battlefield of Lundy's Lane, in the Niagara district which will be held between farmers of Ontario and of New York State.

We have celebrated the century of peace between Canada and the United States. Memorials have been erected at certain points on the 1,000 miles of unfortified boundary and we have lately had goodwill parties of each country visiting and being welcomed by the other. But none of these things was quite so striking as this transformation of the scene of deadly conflict into the peaceful scene of a friendly competition between men of the two countries who live by the soil.

Livestock And Hog

Pools Are Uniting

Saskatchewan Organizations Have Completed Arrangements for Union

An agreement by which the Saskatchewan Hog Pool and the Saskatchewan Livestock Pool unite has been completed. Officers announce that the livestock pool is now half way toward its objective of contracts covering one thousand carloads a year and it hoped to have the pool in operation by the beginning of the year. To enable the pool to acquire handling and processing facilities, the livestock pool contract has been revised to make provision for deductions not exceeding two per cent of gross receipts from the sale of livestock.

New Process For Making Hay

Invention by Chicago Man is Being Tested Out

Farmers can make hay when the sun is not shining, if the invention of Arthur Mason, Chicago, which had its first demonstration at the Walker-Gordon dairies near Princeton, N.J., becomes popular.

The Mason invention takes alfalfa grinds it to meal, all within 30 minutes. A strong air furnace forces gasses over the grass as it moves through a 150-foot oven on an end less belt. Smoked hay, supporters of the new process assert, is more palatable.

Queer Chinese Custom

One of the queerest of the Chinese customs that is sometimes followed yet in Chinatown is that of serving, in orthodox Chinese fashion, a thirty course meal. It includes, among other things, cabbage that has been baked as dressing in spring chickens. But the Chinese throw the chicken away instead of eating it.

Opportunity For British Boys

Major Ralph Glyn, member of the British House of Commons for North Berkshire, visited Western Canada for the purpose of investigating opportunities for British boys in this country. He is preparing a report along these lines to be presented to a special committee of the Imperial Parliament.

Linked up with the history and personification of the British Empire is the familiar, if mythical figure of John Bull—a sturdy fellow, garbed in red waistcoat, leather breeches and armed with a stout oaken cudgel. With him in a recent issue of *John Bull*, the *Washington Irving* expresses the belief that it is characteristic of the English, and their love for what is blunt, comic and familiar, that they have embodied their national oddities in such a figure.

"According to history, the moulding of 'John Bull' began in the year 1712, when John Arbuthnot, physician to Queen Anne, and a friend of Swift and Pope, published a pamphlet, 'Law is a Bottomless Pit.' Exemplified in the Case of Lord Straff, John Bull, Nicholas Frog, and Lewis Baboon, who spent all they had in a lawsuit." Then, again, the name may have originated as a result of the theological controversy following the exit of James II., when the Dutch portrayed England in prints, as a lion, a bull, and sometimes a bulldog, indicating, meadout, our determination and tenacity.

Gilray and Rowlandson are two prominent caricaturists who have played no small part in fashioning John Bull. The former's famous delineation was that of "John Bull Taking a Lunch," in which he is depicted, atop the Battle of the Nile, making a meal of ships, with Admirals as waiters. "John Bull's Turnipgate" is perhaps the best known of Rowlandson's efforts, the sketch showing "John" demanding payment of the toll. The toll referred to the taking of the Test Oath for the purpose of keeping Romanists out. Despite the fact that these two contributors were well known, it could not be said that either representation of John Bull was flattering.

It required the mind of Isaac Cruikshank to introduce a note of refinement by making his John Bull a well dressed squishy personage, reminiscent of the Pickwickian type in appearance. This marked improvement was further accentuated by the work of John Doyle, John Leech and Sir John Tenniel. For the John Bull as we recognize him today we are indebted to the genius of the last-named artist, whose work was ably perpetuated by Sir Bernard Partridge.

Opinion will vary as to whether our present conception of John Bull really exemplifies in the highest degree the characteristics of the British race. Nevertheless, the sturdy figure undoubtedly symbolizes strength, tenacity, and determination, three traits of which we are justly proud.

Shot Bears In Arctic

Woman Hunter from California Returns With 29 Pelts

Experienced Polar hunters left their hats to Miss Louise A. Boyd, San Rafael, Calif., who has returned to London after a six weeks trip to the Arctic.

To Miss Boyd belongs the distinction of having been the first woman to set foot upon desolate Franz Josef Land, to which she made the voyage in Raab Amundsen's old supply ship *Hobby*. With Miss Boyd were Miss Janet Coleman, San Francisco, and Comy and Countess Rivadavia, friends of King Alfonso XII, of Spain.

From the 80th degree northern latitude Miss Boyd returned with the pelts of 29 polar bears, six of which she shot in one day. This is considered enough to turn caxions any Arctic hunter.

The party captured five emus alive. Of the best of those King Rivadavia will present one to King Alfonso.

Miss Boyd took 21,000 feet of film, besides 700 photographs of Arctic scenery.

Expects Warm Welcome

Lady Willington has been spending most of August in London. "This is going to be a big change for you," I ventured, "Yes, indeed," she agreed, "it will be from 'China to Peru' almost literally." I asked her how she thought she would like the Dominion after so many years in India. "We are sure to feel the cold," she said brightly, "but I am assured that the warmth of our welcome will more than compensate for that."

—The Passing Show, London.

Homestead Entries

A total of one hundred and forty-two homesteads and eight soldier grants were filed upon at the Edmonton Dominion Land Office during the month of August. This is a marked increase over the corresponding month of last year.

Etzel (at the breakfast table).—"Mummy, how do the hens know the size of my egg cup?"

Record "Muskie" From French River

This record breaking muskallunge of the season, 35 pounds in weight, was taken from the waters of the French River at the Canadian Pacific Bungalow Camps, by E. A. Farintosh, of the Carnegie Corporation of New York City. Farintosh and his guide had a twenty-five minute battle with this monster muskie before it was finally landed. Twice it leaped clear of the water and three times it took more than 75 yards of line.

MAGIC BAKING POWDER

There is far more **MAGIC BAKING POWDER** used in Canada than of all other brands combined

MADE IN CANADA NO ALUM

E. W. GILLET CO. LTD. TORONTO, CAN.

WORLD HAPPENINGS BRIEFLY TOLD

Crown Prince Leopold of Belgium rode into Stockholm in a third-class sleeper when he arrived to make final arrangements for his marriage to Princess Astrid. He found all the first and second class reservations taken.

Houses built of Canadian lumber after a Canadian pattern are to be given a trial in England after several years of agitation to this end. The London county council is the first to try building Canadian houses here.

The New York World says negotiations for the sale of the Sun and Telegram for approximately \$5,000,000 by the Frank O. Munsey estate to a group of men now publishing the papers are about to be closed. The group of purchasers is said to include editors and executives of the two papers.

The 3,000 family settlement scheme in which the Canadian and British Governments have been co-operating is likely to be extended in scope and continued for a further period, according to Lord Clarendon, chairman of the British overseas settlement board.

The Prince of Wales is so far behind on his dinner engagements that he has called a halt on further invitations until he can catch up. His private secretary has announced that he must decline all invitations except to functions of national or imperial character.

Queen Marie will grant no interviews during her forthcoming visit to Canada and the United States. She will not be accompanied by any official press agent and all information concerning her movements will be given out by a member of the legation staff at Washington who will accompany her.

George Michel, the French baker, who recently swam the English channel in the record time of 11 hours and five minutes, is said to have accepted, through Georges Guillois, his manager, a cable offer from Montreal for a 20 weeks' music hall exhibition tour at \$500 a week. Michel is now awaiting the money to pay for his transportation.

Watch Your Daughter!

Stratford, Ont.—"Dr. Pierce's Favorite Prescription is the best tonic and nerve tonic that can be given to a young girl while growing into womanhood. When I got to the age where I began to develop, I was very backward. I became so nervous I could not sit still. I was not able to sleep, had severe pains thru my back and head. I was very tired, weak and miserable. The lady where I was staying got me a bottle of Dr. Pierce's Favorite Prescription, and by the time I had taken it I was feeling fine, my nerves were good. I got strong, began to gain in weight and developed into womanhood naturally and never had any more trouble."—Mrs. Stanley Tozer, 183 Railway Ave.

Any drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg.

Hurricanes Give Warning

Barometer Falls and Death-Like Stillness Precedes Storm

Twenty years ago, a storm similar to the recent one that devastated the Florida and Gulf coasts swept down on Pensacola and Mobile with considerable damage not only to these two cities but to the towns and villages for miles around, writes William J. Carver in the New York Evening World. In such a hurricane there is ample warning of the onrushing disaster. Down goes the barometer, only, however, for a certain area, sometimes a swath thirty or fifty miles wide. The low pressure causes a partial vacuum that accounts for the death-like stillness that precedes the descent of the storm. Air from the areas surrounding the path of the storm rushes in to fill the vacuum and then you have the storm with all its force and vengeance. It is the rush of air from all directions to fill the partial vacuum that causes what is called the West Indian hurricane.

Joint Stiffness Goes, Swellings Disappear, Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nerviline. For the minor pains and ills that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia and Colds. 35 cents at all dealers.

No Old-Time Sailors

Despite the fact that 365,000 seamen avail themselves each year of the seamen's church institute, New York, Rev. Mr. Campston, the chaplain, who spent his youth before the mast, stoutly insists that there are no seamen today. With the passing of sails, he says, there has come a new type of sailor to man the ships, and the traditional "salt" is now only a character of history.

Relieves Catarrh Almost Instantly!

Nasal catarrh clogged nostrils, obstructs and annoys head colds, dull headaches, buzzing head noises—no matter how bad—now yield almost instantly to the amazing power of **Gerro Wornwood Balm**. A delightfully clean and pleasant home treatment, positively harmless to the most delicate tissues, but powerful enough to break up congestion, allay inflammation and kill germs within a few minutes. Your throat and nasal passages are cleaned like magic—you breathe freely and easily as nature intended—and your dull old head feels clear and clean.

To prove that this is absolutely true and to quickly introduce the treatment to thousands of catarrh sufferers who need it, all druggists are now authorized to supply Gerro Wornwood Balm on a strict guarantee of swift and full satisfaction or money back. No matter how many treatments you have used without success—if you really want to be freed from catarrh, don't miss this opportunity to try Gerro Wornwood Balm without slightest risk of cost unless pleased with results. A 6c box will last for weeks.

To Study Pool

United States Experts are Studying Co-operation Method in Canada

The United States department of agriculture, through the new division of cooperative marketing, has sent experts to Canada to make special studies of co-operation there. Studies are being made in particular of co-operation in handling wheat and livestock. The methods of the wheat pool of western Canada are being carefully inquired into.

The purpose of the investigation is to accumulate data on co-operative methods which can be disseminated among farmers and farm organizations in this country for encouragement and guidance of the co-operative movement.

His Birthday Surprise

Astronomer (to his young wife)—Congratulations, my dear. This is your birthday, and I shall have a great surprise for you tonight.

Wife—What is it?

Astronomer—At 11.30 tonight there will be a total eclipse of the moon.

He: Ah, darling, as we sit together under the spreading branches of this noble tree, I declare on my honor that you are the only girl I ever loved.

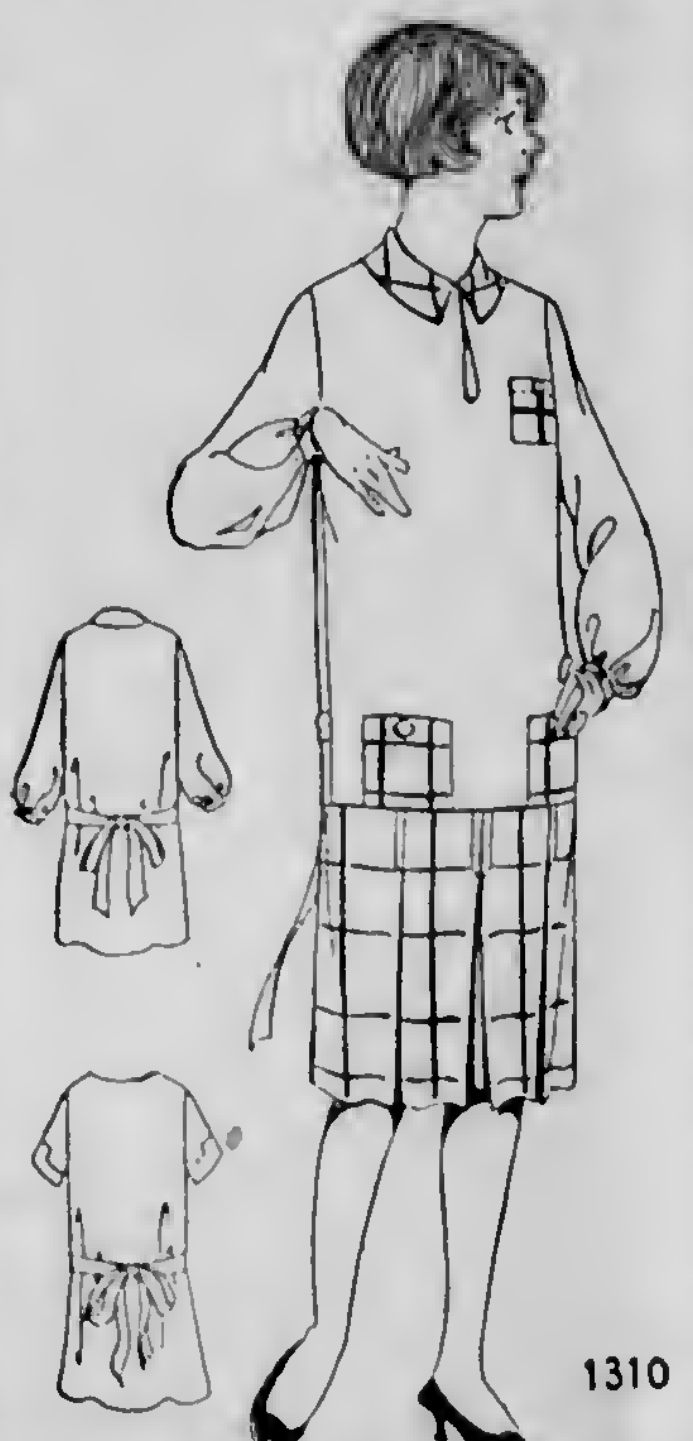

She: You always say such appropriate things, Paul. This is a chestnut tree.—Tit-Bits, London.

An instrument so sensitive that it records the messages sent to the brain of a frog when the creature's skin is gently pinched, has been invented by an English scientist.

Ignorance and conceit are twins.

MR. D. O. WOOD
Who has been appointed General Freight Traffic Manager of the Canadian National Railways with headquarters in Montreal.

Simplicity of Line for School Days

Flannel shows up smartly for this frock—a two-tone combination. It is a slip-over model, with the skirt front, pocket and Peter Pan collar in a plaid design. Long sleeves slightly full at the wrist are gathered into hand cuffs. The back is plain and a narrow belt ties in the centre back. The pattern is perforated for low round neck and short sleeves finished with cuffs. Any of the lighter weight woolen materials could be chosen for frock No. 1310, which is in sizes 8, 10, 12 and 14 years. Size 10 requires 2½ yards 32-inch material. 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Friendship Better Than Hate

League of Nations Breaking the Chill Ice of Distrust in Europe

At Geneva, Foreign Minister Briand of France held out both hands to the German delegates to the League of Nations and pledged his country's friendship to Germany.

If the League would up all its business now and disbanded, its whole creation would have been worth that one supreme moment.

For the chill ice of distrust in Europe is broken. After those words of concord and amity, no statesman of this generation would have the face to affront all decency by breaking that pledge.

Friendship is better than hatred. Europe is finding that out.—Vancouver Sun.

British Columbia Apples

It is estimated that southern British Columbia will produce 3,217,000 boxes of apples this season. This is about 700,000 boxes more than last year's production. Arrangements are being made for a heavy export business to Great Britain, as well as to the Prairies and Eastern Canada.

When a fool holds his tongue he isn't as foolish as he might be.

The Commanding Position Of Our Agriculture
By C. W. Peterson

The average person readily gives an intellectual assent to the statement that agriculture is our basic industry and the "backbone of the nation," but usually without any adequate conception of the fundamental facts of the case. It is a mere figure of speech. It is, therefore, well to consider briefly to what extent agriculture has been responsible for Canada's material progress. Forty-one per cent of our net production in the last census year was agricultural; thirty-three per cent was manufacturing; and our forests, mines, fisheries, construction, etc., account for the remaining twenty-six per cent. The eight billions of total agricultural capital in Canada represents 36 per cent of her total available wealth. Urban real estate accounts for 26 per cent, our railway plants, 10 per cent, forests, 5½ per cent, mines, 2½ per cent, and manufacturing equipment, 2½ per cent.

It will thus be clear that Canada's agriculture looms up as the largest single factor in her economic life, and the farmers as the largest group of domestic consumers, consequently exercising a commanding influence in the general business conditions of the country. One-third of all revenue freight carried by our railways originated on the farm and another third at least, was represented in carrying commodities of all kinds back to the farm and the agricultural raw material to and fro. The Canadian farm not alone feeds the nation, but exports on such a scale that credits are available to balance our international obligations and create a favorable trade balance.

Besides the millions of farm workers directly engaged in producing, there are other millions earning their living by performing work connected with supplying the implements, tools, shoes, clothing etc., for the farmer, with the manufacture of raw material originating on the farm and the distribution and transportation of such commodities. Who is bold enough to attempt correctly to estimate the economic importance of agriculture in a country like Canada? It is perhaps well within the mark to assert that at least 80 per cent of Canada's total population, in every walk of life, depend absolutely on her agriculture, directly or indirectly.

These are imposing figures and should lead thinking men to speculate on the possible performance of Canadian agriculture were we in the happy position where more than a mere fringe of our agricultural area was on a producing basis. If, for instance, we were producing on even one half of our arable lands, instead of only one sixth, granting a fairly balanced population, all our present economic problems would vanish over night. The time is ripe for bringing such a situation about. We have the undeveloped natural resources, the markets are there, we only need the man-power to complete the circle. And that is purely a matter of intelligent, business organization.

Spoiling Precious Stones

As pearls consist of carbonate of lime, vinegar and other acids will eat away the polished surface in a short time. Hot water is fatal to an opal, destroying its fire and sometimes causing it to crack. Soap is a deadly enemy of the turquoise. If a turquoise ring is kept on the hand while washing, in a short time the blue stones will turn to a dingy green.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves Worm Exterminator.

First farmer—"That rainmaker is going to charge us \$1,000 for that shower yesterday."

Second Farmer—"H'm. I suppose that's what they mean by saving up for a rainy day."

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 80 years, its action is pleasant, rapid, reliable and effectual, and relief comes promptly. "Don't accept a substitute." The genuine is put up only by The T. Milburn Co., Limited, Toronto, Ont.

Well-Known Home Builder Quickly Restored To Health

Victim of Nervous Indigestion, Loss of Sleep and Intolerable Pain, Father of 8 Children, Finds Long-Sought Relief. Strength Restored. Praises Tanlac.

Joseph A. Brunet, a well-known Montreal building contractor, 2085 Boyer Street, says: "The brawn, muscle and splendid health of the strongest man will break under the strain of modern living."

"I was suffering untold agonies when I began taking Tanlac. My strength had vanished, I couldn't work efficiently, I couldn't enjoy life as other men did. I had lost weight and was wracked by knife-like pains."

"I was completely discouraged when Tanlac was recommended to me and I took it. I recommend it to anyone who is ailing."

"This tonic worked wonders with me. Quickly my old strength returned. I began to have a great appetite and ate everything without a sign of pain. Once more I knew what it was to have a good night's sleep. Tanlac certainly put me on my feet, made me stronger and gave me a better health than I have had in years."

"Tanic usually banishes pain. Conquers ailments and builds up strength in finished bodies. It relieves the system of poison caused by constipation and sluggish liver. It is nature's own remedy made from roots, barks and herbs according to the famous Tanlac formula."

Banish sickness from your life and enjoy the benefits of golden health. Begin taking Tanlac. The first bottle usually brings results that will surprise you. Ask your druggist for Tanlac—today!

Why Some Candy Doesn't Sell

Quality candy often finds a slow sale simply because it looks "cheap." Inferior wraps discourage sales. But the Appleford wraps win new customers.

The richness of butter scotch shows through the transparency of Appleford wraps. Kisses are more tempting in Appleford's durable twisting tissue. Caramels look more attractive in the Appleford's neat-folding wraps. The slight extra cost is a good investment.

SUNDAY SCHOOL LESSON
OCTOBER 10.

THE REPORTS OF THE SPIES

Golden Text: We are well able to overcome it. Numbers, 13:30.
Lesson: Numbers 13:1 to 14:5.
Devotional Reading: Psalm 95:1-7.

Explanations and Comments

Twelve Spies Sent to Canaan; verse 1-20.—At last an encampment was made in the wilderness of Paran at Kadesh-barnea, near the border of the Promised Land. Then Moses sent twelve spies over the border to ascertain the nature of the land, whether good or bad, whether wooded or not to gain information as to the people, whether they were numerous or not, whether strong or weak, and also facts about how they lived, whether in cities, camps or strongholds. He also directed them to bring back specimens of the fruit they found in the land.

"The land was ready for the people, but were the people ready for the land? The report which Caleb and his companions was to bring was to decide, not a question of geography, but a question of philosophy. It was to test the present capacity of the people of God, to determine whether the heart of Israel was ripe for its inheritance." (Dr. George Matheson.)

"What we do in the crisis always depends upon whether we see difficulties in the light of God, or God in the shadow of the difficulties." (Dr. G. Campbell Morgan.)

New Whistle for Locomotive

No longer will residents along the right-of-way of the Chicago, Milwaukee & St. Paul Railroad be awakened by the shrieking of locomotive whistles. In the opinion of Eugene Duval, local general agent of the road, Locomotives are being equipped with a new "chime" whistle, sounds from which are described by the designer, E. K. Silcox, as "soft as the woodwinds of a symphony orchestra."

Duval said that while the sound of the new whistle is mellow, it can be heard as far as the screech of the usual type.

Externally or internally, it is Good—

When applied externally by brisk rubbing, Dr. Trousseau's Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

More than a million pounds of tea is required to supply the people of Great Britain with each day's beverage.

He (musingly)—I wish I had money enough to get married.

She (coolly)—What would you do?

He—Id buy myself an automobile.

The population of India is three times that of the United States.

Feet sore?—Minard's Liniment.

Radio Advertising Costly

After Six o'clock New York Rate is \$600 Per Hour

Sometimes advertisers are inclined to think that the cost of newspaper space is big. When compared with the radio it is seen how moderate the cost of newspaper advertising is. The sixteen stations associated with WEAH, New York, charge \$4,080 for an hour, \$2,250 for half an hour, and \$2,040 for ten minutes for what is called indirect advertising. The ordinary charge of WEAH is \$450 an hour, and \$240 for ten minutes. After 6 o'clock p.m. the charge is \$600 per hour. However, in spite of these high figures prospective advertisers are standing, with cheeks in hands and programs ready, seeking an opportunity to broadcast their advertisements. — Brantford Expositor.

No. 1 for Bladder Catarrh. No. 2 for Blood & Skin Diseases. No. 3 for Chronic Weakness. Sold by leading Chemists, or return mail from Dr. L. C. S. Co. Montreal, N.W. & London.

New Governor-General Formally Takes Oath Of Office At Quebec

Quebec, Que.—Ceremony and homely words, expressive of deep sentiment, characterized the assumption of office here on Saturday of Lord Willingdon as Governor-General of Canada and the reception to him and Lady Willingdon. The roar of guns, military display, flash of uniform and all the dignity of a country's statesman receiving the King's representative attended their Excellencies' landing in Canada. Then followed the procession to the Parliament Buildings where Lord Willingdon took the oath of his high office. The council chamber of the Quebec Legislature made a perfect setting for a scene of brilliancy.

It was not, however, until the banquet in the afternoon, given by the Government of Canada, that opportunity came for expression of the feelings that were filling all hearts. Premier King and Lord Willingdon alone spoke, and although their speeches were inspired by a vision of the Canada of today and that to come, it was the simple expression of a welcoming people to a new Governor-General and his response that threw a distinguished assemblage into bursts of applause and cheers.

But lowering over everything was the tremendous background of the city of Quebec. The great citadel loomed high above the place of landing, King's wharf. Guns, manned by French-speaking Canadians, roared their welcome, while from out of the mist from the Lévis shore came the reverberations which might, in imaginary mood be the echoes of guns fired in the great days of the past. But they were the echoes of guns of peace and welcome and not of war.

Has Faith In Canada

Lord Darling Has Unbounded Optimism Regarding Our Future
Toronto.—They can go no more steps this Dominion from becoming a great power in the world than they can the Horse Shoe Falls," declares Lord Darling, noted British jurist, here in an address to the Ontario Bar Association, in which he expressed unbounded optimism in Canada's future. "Any one who has been in Canada as I have cannot help being convinced that it has a wonderful future. I only wish it had been borne in on everyone as it has been borne in on me. And Canada is not the only Dominion in the Empire. The Empire will develop. There can be no doubt about it."

Forced To Abandon Flight

French Aviators Fail to Lower Non-stop Record
Paris.—Sergeant-Major Arrachart, and Captain Arrachart, well-known brother aviators who started on a flight to Irkutsk, Siberia, in an effort to lower the long distance non-stop aeroplane record have failed. The French air ministry received a telegram from them saying: "Met bad weather in Eastern Russia. Returning as soon as possible."

Will Consider Steamship Contract
Ottawa.—While no official statement is available at present, it is understood that the Government will consider the situation in regard to the Canada-West Indies steamship service very shortly. The contract for the service expired some time ago, and it has since been carried on on a temporary basis.

35 States Sign

Geneva.—The secretariat of the League of Nations announced that 35 states have signed the reply which will be sent to Washington on acceptance of the United States reservations to the World Court.

Proposals Are Made For Extension Of The Empire Settlement Plan

Ottawa.—New proposals by the British Government for an extension of the plan of empire settlement are, it is understood, being submitted to the Government by Lord Clarendon, administrator of the scheme.

Lord Clarendon has sailed for home, after making a personal inspection into the working of the scheme by which 3,000 British families have been assisted in landing in Canada. His report is that the migrants are doing splendidly in their new localities and that

Has Removed Civil Service From Politics

Successful Move In Manitoba Spreading to Federal Field

Winnipeg.—Efforts to remove the Civil Service from politics and to raise the standard of work have been successful in Manitoba, and now are meeting with success in the federal field, according to speakers at a session of the Citizens' Research Institute's convention here.

The reforms instituted, it was declared, are growing more and more popular with politicians, civil servants and the general public alike.

"The old idea of the old saying 'to the victor belongs the spoils,' is giving way to the more honorable conception of 'the best shall serve the state,'" declared a paper by William Foran, secretary of the Canadian Civil Service Commission.

J. W. Fleming, Civil Service Commissioner for Manitoba, explained the reorganization and economies in the province. Manitoba civil servants now numbered 1,307 members. Reorganization had cut down the number from over 1,500 and efficiency had increased. Promotion, he said, was made from within the service in almost every instance.

Speaking from long Parliamentary experience, W. E. Cockshutt, Brantford, Ont., said the patronage system had been nothing but a "vote loser," and not a "vote catcher."

Major Hume Crayn declared the tragedy of the Civil Service was that of poor pay, which he hoped to see remedied.

Canada's Ambassador to U.S.

Matter Will Be Subject of Discussion at Imperial Conference

Ottawa.—The relationship of Canada's proposed minister plenipotentiary at Washington to the British ambassador there will probably be the subject of discussion between Premier King and the British Government when Mr. King goes to London soon. As pointed out by Premier King some days ago, the appointment of Canada's representative at Washington will not be made until after a discussion in regard to the duties of the new officer takes place. Hon. Vincent Massey, who will be the first Canadian minister plenipotentiary in the United States capital, is going to London and will be present when the matters affecting the position are discussed. Mr. Massey does not go to England as a member of the Canadian delegation to the Imperial conference, but he is arranging to be in London when the discussion takes place.

Date Of By-Elections

Reported Contest Will Be Held on November 22nd

Ottawa.—By-elections for the ministers of the new Government will likely have November 15 fixed for nominations and the 22nd for polling where the seats are contested. The writs cannot be issued until those of the recent election in the affected constituencies are returned, but they are all expected to be in by October 10. After that, a period of about 35 days will intervene before polling.

So far as present indications count, the ministers will not be opposed. The plan is to have all the elections on the same day.

Plans Visit to Russia

London.—Lloyd George, the Liberal leader, plans to visit Russia in the spring to carry out a personal investigation of the Soviet system. It is intimated on behalf of the former premier,

Addresses Research Conference

PROF. W. W. SWANSON

professor of political economy in the University of Saskatchewan, who delivered an address on "Tax Free Bonds" at the Citizens' Research Institute conference held in Winnipeg.

Miners Are Rescued

Forty-three Michigan Miners Brought to Surface After Five Days' Imprisonment

Ironwood, Mich.—Forty-three miners returned to their homes after a successful five days' battle to release them from their underground prison in the G. Pabst iron mine, where they were trapped last Friday.

Rescue of the miners from the depths of the mine was completed at 11:20 o'clock at night. At that hour every one of the imprisoned miners had been lifted to the surface through an adjoining shaft. Physicians decided a day's rest in complete seclusion and hospital comfort, was the best way to safeguard the health of the men. Upon this advice, all men were ordered to Grandview hospital.

The first man to come out of the mine shaft was greeted by the cheers of thousands, the ringing of bells and blowing of whistles.

Police protected the rescued miners as they were brought up or walked out of the shaft one by one.

They went immediately to the mine rescue car, where they were examined.

British Trade Unhindered

Military Intervention in China not Warranted Says Premier Baldwin
London.—Premier Baldwin told the House of Commons that British steamers are plying unhindered between Canton and Hong-Kong and that there has been no interference with British trade at Hankow despite recent agitation.

The Prime Minister said that reinforcements are now being sent to China to render the naval forces in the Far East sufficient to protect British subjects and interests. Military intervention is not warranted, Premier Baldwin said, and no army reinforcements have been dispatched.

Hermit Left \$30,000

London.—Dayard Brown, the eccentric American millionaire, who lived as a hermit for thirty-five years in his yacht off Brighton, died because of disappointment in a love affair in America, left property in England valued at \$30,000, the publication of his will shows Mr. Brown was 72 years old when he died last April. It is estimated he gave away \$2,000,000 during his stay here.

Bringing the School to the Scholars

A school on wheels—a school that suddenly appears one day and goes and comes again—like a magic castle.

It is doubtful if the news of an approaching circus, heralded by dazzling and wonderful advance posters has ever caused as much excitement as the announcement of the coming of the "Canadian Pacific School Train" into the hinterland of Northern Ontario. This unique experiment of bringing

Central Body For Colonization Boards

Executive Committee Wanted to Co-ordinate Activities in Saskatchewan

Saskatoon.—The immediate appointment of a central executive committee, representing the local colonization boards of Saskatchewan, and selected from the membership of the present boards, was urged in a resolution approved by representatives of the boards, in annual convention here. The resolution suggested that the central executive meet at Saskatoon every three months to consider progress made by the 52 boards under its direction.

Election of members of the central executive will take place before the convention concludes tonight.

Another resolution was that telegrams be despatched to Premier King, to Hon. Robert Forke, minister of immigration, asking that the local colonization boards be officially recognized by the Dominion Government, as are the Lutheran Immigration Board and the German Catholic Immigration Board.

The convention approved a resolution calling upon the Dominion Government to sell for settlement purposes school lands within 10 miles of a railway line.

Building 'Plane For Trans-Atlantic Flight

Giant Machine is Now Under Construction in Italy

Paris.—The Caproni aeroplane works now are constructing an aeroplane of 2,000 horse-power for a trans-Atlantic flight, according to Clifford Harmon, wealthy sportsman and president of the International Aviation League.

Mr. Harmon, with the Italian ace, Col. Falcini, flew to Paris from Milan on a tour of the posts of the aviation league. Speaking at a luncheon the league gave for Col. Falcini, Mr. Harmon said that he would back the colonel to make a trans-Atlantic flight. Mr. Harmon then told of having seen the giant Caproni being built.

"The Italian flyer who will pilot this 'plane has not been selected as yet," said Mr. Harmon. "But if Col. Falcini could I will back him to win and I will shoulder all the expenses of this attempt personally."

It is rumored that Col. Falcini, as well as the noted long distance flyer Commander De Pluado, is being considered to make the flight.

Will Apply The Remedy

New Minister of Customs Says He Believes in Action

Kitchener, Ont.—"First find out as completely as possible what's wrong, and then apply the remedy," is what W. D. Euler, newly appointed minister of customs in the King Government, is going to do when he takes up his duties at Ottawa, he said yesterday. "That's all that could be expected from a man in my position just now," he added. "This is not the time to talk but to act."

Accidents at Rodeo

Toronto.—Ray Miller, Cheadle, Alta., sustained a broken leg when kicked by a horse; Coyote Frank of Great Falls, Mont., suffered concussion of the brain when thrown, and Jack Cooper of Jasper Park, Alta., had his forehead split open by a kick from one of the ponies at the rodeo here.

Questions Which Will Likely Be Dominant At Imperial Conference

Find Place For Immigrants

New Minister of Immigration Is Interviewed at Winnipeg

Winnipeg.—Hon. Robert Forke, federal minister of immigration, when interviewed here on his return trip from Ottawa, said that the department of immigration would concentrate on finding a place for the immigrant before he is brought to Canadian shores, rather than letting him come to Canada with his small savings to shift for himself.

Mr. Forke, when asked to state his policy with regard to immigration, protested that he had hardly had time to get acquainted with the officials of his new department, much less to get his immigration policy ready for publication.

He asserted that he had unbounded faith in the future of Canada if the right sort of immigration is maintained.

When asked if he would particularly endeavor to get immigrants to place on the farms, Mr. Forke, emphatically declared that he did not think any particular class would be favored so long as the immigrants were healthy in body and mind and willing to work.

The Minister of Immigration, who is also leader of the Progressive party in Manitoba, declined to make any statement regarding what support the Progressives of Manitoba would be willing to give Premier King.

"There is a by-election coming," he said, "and I may not be leader of the Progressives in this province after it is over."

Military Occupation Of Germany Is Hindrance

Described as Humiliating Now That Germany Is Member of League

Berlin.—The German papers of every political shade view the German incident in which a French officer killed one German and wounded two others, as proof that the military occupation system constitutes the greatest hindrance to a Frenchman understanding. As long as foreign troops are on German soil, they say, brawls and friction are likely to occur, and one effort might be to wreck the entire work of reconciliation started by Messrs. Briand and Stresemann in their conversations at Geneva and Thoiry.

Continuation of the occupation is felt to be particularly humiliating now that Germany is a partner with her former enemies in the League of Nations. The press is especially emphatic in demanding that measures might be adopted corresponding to the spirit of the Locarno treaties.

Would Help Politicians

Combining the Human Voice With Moving Pictures

London.—Government leaders, having been successful in showing themselves to the people through the movies, may now combine with the movie feature the transmission of their voices to the public.

Following its recent widely displayed film showing cabinet members at work and at play, the Government has acquired a new invention which co-ordinates the human voice with the movies. Already Sir William Joynson-Hicks, Home Secretary, has appeared in the movies with a speech given by means of the new device.

Bandits Attack Motorists

Mexico City.—Bandits again have attacked motorists near Mexico City. The authorities say that no foreigners were involved. Two Mexican motorists were wounded by the bandits, who escaped. Troops are said to be pursuing the outlaws. They are under orders to exterminate the band.

Enforce Rum Running Agreement Between Britain And U. S.

Washington.—The new rum smuggling agreement with Great Britain, negotiated at the time of Assistant Secretary Andrews' visit to London last summer, has been declared effective as from September 29.

The agreement was made operative through an exchange of notes between

Ottawa.—Within the rooms of dingy old "No. 10," the Imperial Conference meets again on October 19. From the four corners of the Empire will come representatives of the self-governing Dominions, of India, and the crown colonies and protectorates. There will be the usual round of function and festivity. There will be the customary questions which, conference after conference, have become part of the recognized order of things. But this year, two questions are likely to be dominant, one political, the other economic. On the one hand, discussion of constitutional relations will bring up among other things the mechanism of foreign policy—whether a common foreign policy for the Empire is practicable and what part the Dominions should play in the formulation of such a policy.

On the other, overseas settlement, the problem of migration within the empire, will be a leading economic issue.

The progress of empire settlement has been admittedly disappointing. And, looking to its improvement, two proposals will probably be made at the conference: 1. That the Dominions should modify their restrictions on immigrants.

2. That the Dominions should share with the British Government the cost of training urban dwellers for work on the land.

Three short years have passed since last the Imperial conference met in London. In the interval, the political wheel has revolved bringing new faces, raising new problems. Three years ago, the economic, rather than the purely political, was the forefront. The Baldwin government offered increased tariff preferences on certain Dominion products entering British markets. The conference welcomed the British offer. Premier Baldwin followed by announcing himself protectionist. On the issue of protective tariffs he appealed to the polls and was defeated. In consequence, part only of his preference offer was put into effect. In consequence also, preferential tariffs, although they will no doubt arise at the conference, are unlikely to play the part they played three years ago.

Must Revise War Debts

Even United States Will See Necessity Says London Times

London.—Discussing the impending elections in the United States, The Times, in an editorial contends that although at present there is no prospect of the people of the United States modifying their attitude on European debts, "the next five years will show that reparations and debts will not and cannot be paid in any such measures as the politicians now declare and that the politicians themselves will be forced to admit the impossibility that reparations and debts can be paid at all if the United States tariff is maintained at its present level."

The cancellation or revision of debts, the newspaper thinks, will not be sentimentally inspired, but recognized as an act of wisdom and necessity.

"It is only bare justice to admit," The Times adds, "that this recognition may be somewhat deferred with-out, for this reason, seeing in the United States a Shylock without conscience and without heart."

Will Attend Conference

St. John's, Nfld.—Prime Minister Monroe, Newfoundland, accompanied by Hon. A. B. Morin, was a passenger on the Furusss liner Nova Scotia, which sailed for England to attend the Imperial conference. Hon. W. J. Higgins, Minister of Justice, has also left for England to represent Newfoundland in the Labrador boundary case before the Privy Council next month.

Canadian Poultry For United States

Government Certified Birds are in Demand in the U.S.

High school pupils who operate a community hatchery at Saybrook, Illinois, will use Canadian Record of Performance cockerels in their breeding pens next year, 186 ten week old cockerels from R.O.P. dams having been shipped to these young poultrymen by the R.O.P. Breeders' Association of British Columbia.

There are in every province of Canada organizations of poultrymen who have birds entered in Canadian Record of Performance. The birds of these breeders are registered on the home farm, under governmental supervision, and official records are issued by the Canadian Government for birds which lay over 150 eggs in a year, provided that the birds are healthy, free from standard disqualifications and that the eggs average over two ounces each. For birds which lay 225 eggs in a year advanced certificates are issued. These government certified birds and their progeny are sold through the associations and many sales to the United States and practically all sections of the world have been made.

Measure That Is Unreliable

Teaspoon Should Hold Dram But Size Varies Greatly

"A teaspoonful three times a day after meals with a little water." That is often the direction seen on a medicine bottle, and the interesting question was raised recently at the meeting of the Pharmaceutical Association as to what amount a teaspoon should hold. It was said it should be a dram. Now go and see how many different sizes there are in teaspoons. Some would hold more and some less than a dram. Various suggestions were made at this meeting to overcome the difficulty, but eventually the decision was that it was not a subject for the association, but for the spoonmakers, and it was left to them. We do not suppose that in most cases a slight difference in size is a serious matter, but it is a curious question. It might be asked if all the medicine glasses agree in the amount marked on them as representing so many teaspoons and tablespoons, and also what does a "pinch" of anything mean; a man would pick up more than a pinch of girls' fingers.—Kingsdon Standard.

Says It Cannot Be Done

Impossible to Shoot a Projectile to the Moon

Rumors that somebody in Moscow wants to shoot at the moon have caused the academic criticism of Professor A. W. Hekerton, the astronomer, who says flatly in the London Daily Mail that it cannot be done.

"To order, to escape the gravitation of the earth," he points out, "your projectile needs a velocity of seven miles a second."

"The thermal energy necessary to carry a projectile of matter at this speed is 15,000 calories. The energy of a gram of a Krupp shell is about 100 calories. The energy of a gram of our most violent explosive is only 1,000 calories."

Is less than 1,500 calories. Consequently, if the explosive had nothing to carry except its own weight, it has less than 10 per cent of the energy necessary to enable it to escape the earth. To reach a distance of four miles in the air, the projectile would need a thermal energy unit equal to 7,500 calories. Where can we get such energy? Nobody knows."

An All-Round Boy

"How is it I never can find you when I want you?" asked the office manager. "First you're in the stock room, then in the factory, then down in the shipping department, and now here you are on the roof. What's the big idea?"

"Well," answered the new office boy, "you advertised for an all-around boy and that's me."—Christian Science Monitor.

Want Gold-Plated Radios

Radio is reaching the gold-plated age. Hundreds of visitors to the Radio World's Fair at Madison Square Garden, New York, are willing to pay high prices for sets with a gold plated finish, according to exhibitors. One exhibitor began with nickel plated sets, but the public soon demanded those finished in gold plate.

Nearly 150,000 persons in Austria are receiving government unemployment aid.

Mussolini has decreed that Greek and Latin classics must be included in the curriculum of Italian schools.

A fool friend can wield a hammer as effectively as a bitter enemy.

W. N. U. 1519

A Very Long And Severe Winter Promised

Washington Scientists Say It Will Last from Early Fall Until Late Spring

A winter which will begin early in the fall and end late in the spring, which will bring "extremely deep snows" and which will be, in fact "one of the severest ever known on the North American continent," is on its way.

Should there be, before the first of the year, a great volcanic eruption anywhere on the surface of the globe, the Northeastern United States may expect in addition, a general snow storm about the middle of next June, a killing frost the latter part of that month, an ice-building freeze the night of July 4, and another equally intense early in August.

There will be, in short, in 1927, a recurrence of the "year without a summer," that made 1816 a year of misery.

But of even more immediate interest, perhaps, than these dire predictions, is another forecast that emanated from the Thirtieth Annual National Business Conference, at Dabson Park, when scientists and engineers discussed the weather in general and solar radiation in particular.

The time is possibly coming when radio waves, equipped with a forecast of the "radio weather" for weeks in advance, will be able to select with scientific surety the nights for "listening-in" when they will be certain to hear to the best advantage and likewise plan quiet evenings with their books for dates far distant, when the static is certain to be terrible. It all depends, both the weather and conditions of radio reception, the speakers declared, on the sun.

Herbert Janvin Browne, of Washington, D.C., is author of the alarming prognostications concerning the coming year. They were contained in Mr. Browne's paper "1927—A Year Without a Summer."

The prediction concerning radio was offered by Greenleaf W. Pickard of Boston, consulting engineer and radio inventor of note.

New Invention Will Consume Motor Fumes

Menace of Carbon-Monoxide Gas said to be Overcome

A recent experiment in the city laboratories of Paris is said to have demonstrated the practicability of a "catalyzer" designed to consume the carbon-monoxide gas produced by motor cars which Prof. Yandell Henderson of Yale and others have asserted was a serious menace to public health in crowded cities.

The device consists of an exhaust pipe containing certain chemicals possessing catalyzing properties which reduce the combustion temperature of the noxious gas. By the passage of a current of air through the tube the fumes are consumed before they can pass out into the street.

M. Kohn-Albrecht, director of the laboratories, says that the average motor car in Paris gives off one-half cubic meter of carbon monoxide for each half gallon of gasoline burned and that a cubic meter of such gas renders six cubic meters of air unfit to breathe. In the country the half cubic meter of gas is scattered along half a dozen miles and consequently is harmless, he says, while in Paris the automobiles move more slowly and often fill the air of narrow streets with injurious quantities of fumes.

Labor Conditions Healthy

Workers From United States Brought to Canada to Supply the Shortage.

The fact that the province of British Columbia this year could supply only about two-thirds of its quota of men for harvest work in the prairies is an indication of healthy labor conditions here. The principal fields for labor in British Columbia, in addition to agriculture, include lumbering, mining, fishing, transportation and manufacturing, and the fact that the required number of men could not be spared for the prairie indicates active business in these various lines.

Because of the shortage of labor on the prairies which could not be supplied in either Eastern Canada or British Columbia, an appeal was made for workers from the United States and many Americans entered the Canadian harvest fields.

It was one of London's grey days when one American greeted another American in Piccadilly.

"Lil' ol' London's got no skyscrapers yet," remarked one.

"Plity, loo," answered the other gazing heavenward. "I never saw a sky that was more in need of scraping."

A friend is one who applies the brakes when he sees that you are going down hill too rapidly.

Watch Pressure In Your Balloon Tires

Under-Inflation Causes Treads to Wear Out Faster

Do you watch the pressure in your balloon tires?

Carelessness in this important detail may cost you thousands of tire miles if persisted in.

Under-inflation causes treads to wear out faster, and balloon tires in this condition are also easy prey for stone or curb or car track bruises, injuring the cord fabric which sooner or later produces blowouts.

Once a week is not too often to check your balloon tire pressure. The pressure should not be allowed to drop more than three pounds lower than the recommended standard before inflating again. When starting on long trips, with capacity loads, it is advisable to put a couple of extra pounds of air into the rear three as a margin of safety.

A Queer Jewish Law

Death of Groom's Parents Only Excuse for Postponing Wedding

A wedding which took place in Leeds was followed within two hours by a funeral from the bride's home. The marriage of Miss Vera Watterman was arranged some time ago to take place at the local synagogue. The day before the wedding her mother died. A rabbi stated that only in the event of the death of the late bridegroom's mother or the bride's father could the wedding be postponed. According to Jewish law, neither the bride nor bridegroom is allowed to mourn within a period of seven days from the wedding ceremony. They, therefore, did not attend the funeral. After seven days the bride must enter a period of mourning for seven days. No rabbi in the city could recall a similar occurrence.

Promoting Better Homes

Women's Institutes Represent an Organized System in Canada

In no country of the world today is there such an organized system to promote better homes as in Canada, particularly in the rural districts. The Women's Institutes are to be found in every community with well worked out courses in home economics provided through them by the Department of Agriculture. Home nursing, sewing, serving, millinery and all the allied home arts are taught in short courses.

An Aberdonian went into a chemist's shop and asked for three-penny worth of arsenic.

The chemist inquired what he wanted for.

The Aberdonian replied, "Two-pence."

Speeding Up Farm Life

The Automobile Making a Vast Change in the Life of the Farmer

Life in rural Canada is definitely speeding up. That would be a safe guess with any one, and now and again evidence is specifically presented. The other day an Ontario farmer, bought a motor car for the reason that without it he could not keep up with the procession. "If I go to a funeral or get into heavy traffic anywhere, I am just in the way and hold up everybody else with my horse," he said. So he joined the majority and decided to drive with gasoline. He will make his 25 miles an hour now with his neighbors and with the strangers who invade his roads.

Rural driving used to be a leisurely affair. If the horse wanted to walk, well and good. If the driver was impatient he used a whip to secure a trot. As for a procession of any kind, a three-miles-an-hour pace was the practice. A good road horse might maintain eight miles an hour. Under such conditions a farmer's radius of intercourse would seldom exceed ten miles. Now he may go twenty-five miles after supper and return, and on a week-end may go a hundred.

It is a changing world, and the farmer who bought a car to keep up with the procession was tuning in with the times.—Toronto Globe.

An Ingenious Wasp

Built Home in Centre of Spool of Silk

The ingenuity of a wood wasp who took possession of a reel of silk and built a home in the hole in the centre of the reel, is related by C. P. Jenkinson, Leigh, Westbury, Wilts. In a letter to a London newspaper.

The wasp, after inspecting the home-to-be, seated up one end with a cement made of mortar gnawed from a wall. Inside she built four cells, and later they were found each to contain five caterpillars and an infamously wasp.

A Theory About Food

The Germans are notorious for their big appetites, often eating as many five meals a day. An explanation may be found in a theory advanced by Dr. Friedberger of Greifswald University. He says their food is too thoroughly cooked. In one year's experiments Dr. Friedberger discovered that freshly cooked food more quickly satisfied his hunger, nor was as great a quantity required as when he dined on "overdone" food. Subsequent experiments confirmed the theory.

Some people act the fool intentionally, while others who have no histrionic ability whatever attain similar results.

Has Own Fire Brigade

St. Paul's Cathedral Also Has Its Own Water Service

St. Paul's Cathedral in London has its own private fire brigade and water service, says T. H. Mils. The water service was installed shortly before the World War. Though the cathedral does not appear to the casual observer as being a building that would burn easily, being mostly of stone, there are hidden away in the thickness of its walls and elsewhere in its interior several hundred passages, corridors, rooms, staircases and cupboards composed largely of wood.

The great outer dome, which is to be seen from the street, also is made of wood incased with lead. Another reason for the fire brigade is the fact that most of the wood in the structure is many years old and unusually dry, making it excellent tinder in event a fire should start in the building.

The Perils Of Lightning

Motorist Runs as Much Risk as a Pedestrian

When lightning threatens it is always safer to be in a building than out of doors, and to be in a town than in the open country. In the open country trees and high ground should be avoided, particularly isolated trees and those at the edge of a wood.

In a woody country the proximity of tall trees is dangerous. In a high, open country, a ditch or dike should be sought when the storm is severe.

The insulation afforded to the motorist by the tyres of his car is extremely small, owing to the enormous energy behind a lightning flash. In the open a motorist runs as much risk as a pedestrian, and cars should not be stopped under trees or close to wire fences.

An Unknown Poet

Few People Know Who Wrote "The Death of Nelson"

Although this phrase, a line from "The Death of Nelson," is known wherever Britons are to be found, probably not one in ten thousand could name its author; for he was not among the great poets, although he wrote not only this great song but also the equally well-known song, "The Anchor's Weighed." His name was Arnold, and his father had been organist of Westminster Abbey.

"The Death of Nelson" as a song owes its popularity to two great tenors of the past, John Braham and Sims Reeves. John Braham composed its rousing tune, and, like his successor, Sims Reeves, sang it hundreds of times.

A Washington woman was recently arrested and fined for driving an automobile with one arm around her pet poodle.

Doing Away With Sleep

Chemists May Succeed in Making Sleep Unnecessary

One cannot read the proceedings of the American Chemical Society. In session recently at Philadelphia, without having the suspicion that we are soon to live in a new world. The chemists are duplicating the performance of nature so effectively, in giving us the odors of flowers, the flavors of fruits and spices and so on, that we must not be surprised they have now reduced all disease to a matter of chemical action, and propose to find cures in appropriate reagents. Their latest propositions are to make our foods by synthesis, instead of waiting for the slow process of cereal growth, and to enable us to do without sleep by supplying the needful drug to the blood.

The caprices of fashion have played havoc with many industries of late—notably the makers of decorative combs, hairpins, curlpins and hairnets—and now the manufacturers of beds and boudoir furnishings are menaced by the chemists. Incidentally, if synthetic foods come into vogue, the farmer will be put out of business.

It is difficult indeed to visualize and contemplate a world in which men and women will not need to sleep. Instead of going to bed, as they have been doing since the dawn of time, the chemists tell us all they need to do is to swallow one or two pellets of the particular chemical which sleep creates in the human system, and then go about their business with reenergized energy. The economic possibilities of such a change are beyond computation. But the thing may not happen. These wise fellows, who toss atoms and electrons about in re-actors and test tubes, have not yet identified the particular drug which will meet the physical requirements of sleep. They suspect its character, and are already chasing it in their laboratories; but they haven't got it lassoed yet. Experience warns us, nevertheless, that when they get after anything in dead earnest they generally run it down.

There is one bright aspect of the matter. If the chemists succeed in making sleep unnecessary, there will be no more snoring.—Ottawa Journal.

School Days

When Thoughts Return to the Little Red Schoolhouse of Former Days

Perhaps the Hucklebury News is right when it says that the children of today go back to school with lighter hearts than the children of the generation now doing the business of the world. Our contemporary thinks this is so because the schools are brighter, books more interesting, methods more elastic and ways of getting to school easier than they were in days gone by.

No one will dispute this very strongly. Certainly the modern public school and private schools are made very comfortable for the young. Certainly intelligence is higher in the teaching department. At the same time it is permissible to think affectionately of other days. At least it is an associate of youth, which goes away so fast.

It is permissible, too, to recall the room where studies and recitations went together, the pail of water with the one tin cup in the corner, the healthy lack of fear of germs, the joy of vigorous life in days gone.

But the school of today is a wonder. Most of the folks don't know the half of it.

Toronto Fair Made New Record

A new high record for attendance at the Canadian National Exhibition during the two weeks it operates has been made this year, 1,673,000 people having passed through the turnstiles from the opening on August 23 to the closing night. The former high record was 1,515,000 made in 1924, and the figure last year was 1,491,300. The Canadian National Exhibition is unique in being the greatest annual exhibition in America, if any in the world.

New Treatment For Partial Blindness

Ultra-violet rays are being used successfully to treat cases of partial and incipient blindness at Moorefields Hospital, London. More than one hundred persons have been treated and the results have been an encouraging fact that the equipment is being multiplied. The treatment has been peculiarly helpful for the eye diseases arising from tuberculosis. It is given locally by a rod applied to the affected part through which the rays are sent in a concentrated form.

No More Liquor Ads

Punch, London weekly, has decided hereafter to refuse to print advertisements of liquor. After the existing contracts expire no new ones will be entered into for such advertisements. No explanation for this revolutionary move has been offered.

1.—Lieut-Governor Perceval and Mrs. Yvonne McKenna. His Honor is wearing the coat that was made in a day.

2.—The wool that became a Lieut-Governor's coat in one day.

From Sheep to Governor in 12 Hours

When the prize sheep of J. T. Brethour's herd at Brantford, Ontario, opened his sleepy eyes on the morning of August 28th, he little thought that in scarcely more than twelve hours his luxurious back would be worn as a topcoat by the Lieutenant-Governor of the Province of Quebec.

But that is just what happened and how the feat was accomplished was related by His Honor Lieutenant-Governor Narcisse Perceval, who referred to the smart garment he wore in opening the Canadian National Exhibition in Toronto recently.

"This overcoat dropped from the skies," stated his Honor, which is just what it did.

Since no Lieutenant-Governor of a sister Province had appeared at the Canadian National Exhibition in an official capacity for over 20 years, the

Executive of the Canadian Wool and Knit Goods Industry decided to mark the presence of the Hon. Mr. Perceval in this way.

At 5 a.m. the best sheep in the herd of Mr. Brethour was shorn at Brantford by his nephew, Mr. Russell Teuplar. By 2 p.m. the wool had been scoured, dyed, blended, carded, spun, warped, woven, finished and shrunk, and a fine piece of herringbone tweed was given to Mr. Quinlan, a Brantford tailor. By 4 p.m. the coat was finished and ready to wear.

Then in a watertight package it was rushed by motor to a flying field, picked up by aeroplane and brought down at the Exhibition by Parachute Jump J. L. Chapp, who jumped from the machine into the water, where he was picked up by a motor launch at exactly 5.45 p.m.

The Hon. Mr. Perceval was accompanied by his daughter, Mrs. Yvonne McKenna, his A.D.C., Lieut.-Col. Papineau, His Honor Mr. Cockshutt, Lieut.-Governor of Ontario, Miss Cockshutt, and Colonel Fraser, all six being dressed in "All Canadian" costumes. His Excellency, during his visit to the Exhibition inspected the Canadian Co-operative Wool Growers exhibit, which consisted of a miniature factory, operating machinery, and samples of many finished and raw products from all provinces in the Dominion. He also made a special visit to the Canadian Pacific exhibit and expressed his admiration of the model train from Wembley which is electrically lighted and operated and runs in front of a frieze which takes the observer from Quebec to Vancouver.

Will Not Reduce Pensions

New Regulation Extends the Principle of the Irreducible Minimum

No further reduction will be made in the pensions of less than 50 per cent., providing that during treatment the presence of active disease was definitely established. This announcement was made recently by the Dominion headquarters of the Tubercular Veterans' Association, following negotiations with the board of pension commissioners. Last spring the board conceded the justice of an irreducible minimum pension of 50 per cent. for tubercular veterans in receipt of that amount or over. The new regulation extends the principle of the irreducible minimum rate of pension to those in receipt of less than 50 per cent.

Joanna had spent more than a tenth of her million dollars. It was all to be cancelled in the cancelled checks.

"The play begins! It is to be a comedy, after all!"

It was said quietly, evenly, but there was just a nuance in the tone that might have been repressed exultation. The speaker stood behind the banker, a figure in faultless evening clothes, silk hatted, white gloved. About his lips played the wreath of a smile—a cynical smile. In his eyes there was amusement. Just at that moment an ancient butler appeared at the library door and spoke:

"Your car has arrived, Mr. Brandon."

Eggleston started. "You will be seeing her, tonight, then?" he asked calmly.

"Yes. She will be plunged into the abyss tonight, by her new friend, Yvonne Coutant. She will swim like a shrouded mermaid through the sordid senses of half a score of old men whose lips she'll moisten with the sight of her, and half a hundred young men who will make wagers as to which will be first to break her. The end is in sight tonight."

Eggleston did not reply for a moment. He raised his glance again to the girl in the painting. Then he said, heavily:

"Still, I'd like to see her—here, in this room. Arrange, some way, to bring her tomorrow."

Brandon bowed slightly, and went out of the room and to his car which waited at the curb. He gave his order briefly: "To Miss Coutant's."

Meanwhile Joanna, before her mirror, waited to be summoned to the old men and the young men, and their young women and old, downstairs.

Yvonne appeared in the doorway. The younger girl gave a little gasp when she saw her. In contrast to the soft white tones of Joanna's gown, Yvonne's was a shining black velvet that clung to the curve of her figure like a sheath, giving her vulcanite and uncovered back shone boldly and hair its complement. Her shoulders glistened white.

"You will be something of a sensation, tonight, my dear!" the older woman exclaimed, when Joanna had walked across the room, and had whirled and stood still for her inspection. Joanna was much too happy to reply.

Yvonne's appearance among her guests was the signal for dancing to begin—also for the breaking down of all barriers built by formalities. Women who had gathered in stiff little groups to discuss other women or the escapades of other women were swept away to their first dance and their first drink and the first round of their preferred flirtations. The big drawing room had been made into a dancing room, in the winter garden the only lights were flickering lanterns hidden among the foliage. Great palms made screens across corners of the drawing and sitting rooms, and in the hallways.

"Yvonne," said Mrs. Brownly-Smith, "knows that two people never have to fumble for conversation when they're hidden behind palms."

(To be continued)

Peasant's Son Made Ruler

Chosen Fifty Years Ago as Gaekwar of Baroda

The Gaekwar of Baroda has achieved a record. He has sat upon his throne for fifty years, an unusual term among Indian rulers in recent centuries. The state over which the oddly titled ruler has presided for half a century is described in a bulletin from the Washington, D.C., headquarters of the National Geographic Society.

"Baroda, one of the wealthiest of the Indian native states, is a group of 'islands' on dry land," says the bulletin.

"The territories, which total 8,000 square miles, begin near the west coast of India, 150 miles north of Bombay City, and extends for 200 miles to the north. Other fragments are scattered over to the west coast on the Kathiawar Peninsula, the most remote being 225 miles from Baroda City, the capital.

"The life of the present Gaekwar has been like that of the hero of a fairy tale. In 1875, the ruler of Baroda was accused of attempting to poison the British resident, and was deposed. He had no heir, so a search was made by the British Government for a collateral relative. A young lad, the son of a humble herdsman, was chosen and was placed on the throne in 1876. It is he who is the present Gaekwar.

Canadian Pacific Exhibits

Canada Being Advertised Throughout The World Through Agency of C.P.R.

One of the most potent ways in which the Canadian Pacific Railway is advertising Canada both to the Dominion itself and to the rest of the world is through the work of the Exhibits Branch of the Company, and some idea of the latitude and comprehensiveness of the efforts of this branch may be gathered from the fact that at the time this is written seven expositions are being staged simultaneously under its direction—at the Canadian National Exhibition at Toronto; at the Sesqui-centennial Exhibition at Philadelphia; and at fairs at Quebec, Sherbrooke, London, Ontario, Fredericton and Saint John, New Brunswick. And this is but a phase of the unceasing work which is being performed by the Company in keeping Canada and the Canadian Pacific Railway before the eyes of the world.

For years the Canadian Pacific Railway has participated with an outstanding display at the Canadian National Exhibition at Toronto, and the exhibit, annually improved, is declared to be finer than ever this year. Months of study on the part of directors, weeks of labor on the part of painters, engineers and mechanics, have contributed to the fine artistic presentation, startling for its clever illusions and unique lighting effects. The whole presents a very complete survey of Canada, its scenic attractions, agricultural and industrial resources and commercial life. A model train, electrically operated and illuminated, specially brought from the British Empire Exhibition at Wembley, where for two years it was a centre of attraction, runs in front of a frieze which takes the visitor, through a cross section of Canada from Quebec to Vancouver. Such accurate attention has been paid to detail that central points as Quebec, Montreal, Toronto, the Twin Cities, Winnipeg, Banff, Vancouver and other cities are easily recognized.

Having regard to the increasing national character of the Canadian National Exhibition, and the manner in which it is attracting exhibitors and visitors from all parts of the globe, this is to be considered a national work of world-wide advertisement, in line with the policy adopted by the company in 1911 when inaugurating exhibits, of neglecting no opportunity of bringing Canada forcibly and appealingly to the attention of the world. It is in a way comparable to the work the company performs periodically by representation through elaborate and expensive exhibits at the world's larger expositions.

Some of these have been the New York Land Show in 1911 and 1912; the Chicago Land Show in 1913; the San Francisco Exhibition in 1914 and 1915; the Foire de Lyons in 1918; the New York Chemical Exhibition; and the Tokio Peace Exposition. For two years the company was represented through a handsome pavilion at the British Empire Exhibition at Wembley. Following this, space was taken at the New Zealand and South Seas Exhibition for an elaborate pictorialization of the Dominion. At the present time "Treasure Island," brought from Wembley, is an outstanding attraction at the Sesqui-centennial Exhibition at Philadelphia. Almost without interruption Canada is being advertised in some part of the world through the Company's participation in a world exposition.

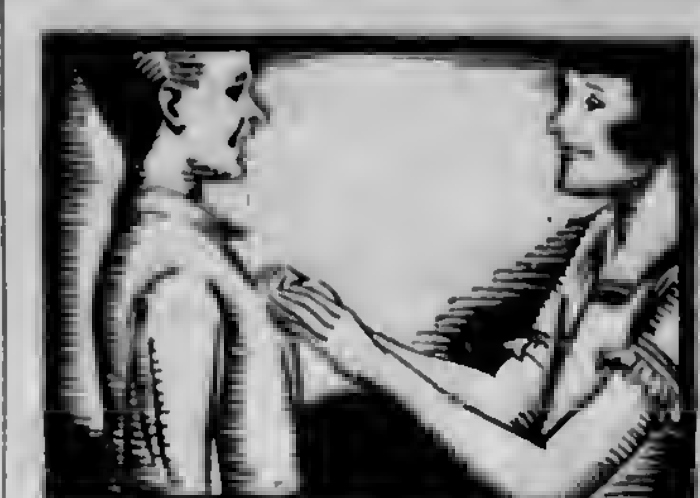

The Exhibits Branch makes it a point to every year install exhibits at all the larger fairs throughout the Dominion, provincial, municipal, and elvite, bringing to the attention of the people of one section of the country the beauty and resources of other sections. In addition it maintains thirty-five permanent exhibits in great centres of population in the United States and Canada, as well as others in the British Isles, with reproductions of Canadian scenery and samples of Dominion products which are potent advertisements of the country's opportunity to the people of the Republic and the tourist to Canada.

The Exhibits Branch has rapidly developed to be a very important phase of the operation of the railway, of tremendous value to the Dominion at large, with benefits that are many and wide-spread though frequently they are difficult to trace. Appropriations for this branch of work are now considerable; the men engaged in its operations are highly specialized; great artistic, mechanical, and organizing ability are called into play. All this that Canada may be adequately represented wherever large crowds of people are brought together, and its opportunity kept ceaselessly before the world.

Accused (just acquitted, to counsel): Thanks awfully, old man. What on earth should I have done without you?

Counsel: Oh, about five years.—

Minard's Liniment for chapped hands.

Dressing Children no Problem Now!

It doesn't cost much to keep the youngsters dressed in all the pretty colors of the season! Buy less, sew less—and Diamond dye their dresses, waists, blouses, etc.

Home dyeing is easy. It's lots of fun. The results are perfect, when you use real dye. Right over other colors, any kind of material, in an hour's time! Keep your own clothes in style, too, by making them the newest shades. Also, the drapes and hangings in your home.

FREE for the asking, at any drug-store: the Diamond Dye Cyclopedic, full of suggestions, with easy directions. See actual piece-goods color samples. Or write for free illustrated book Color Craft to DIAMOND DYES, Dept. N10, Windsor, Ontario.

Hallowe'en Dance in the Opera
House, Saturday, October 30th.
The hall will be specially decora-
ted. Twenty-five prizes will be
given away. All welcome.

THAT'S THAT

"What is ratio?" asked the
professor.
"Ratio is proportion," said
the student.

"What is proportion?"

"Proportion is ratio."

"But what are ratio and pro-
portion?"

"Each other."—Boston Tran-
script.

Mother: "No, Joan, dear. No!
You can't go in the water until
I've houghl you some 'wings'."
Joan: "Wings, Mummie? But
I don't want to fly, I want to
thwin."

INDISPENSABLE

"My friends," said the lectur-
er as he waxed more and more
eloquent, "if we were to turn and
look ourselves squarely in the
face, what would we find we
needed most?"

There was dense silence. Then
a small boy piped up, "A rubber
neck, mister. Is that right?"

LIFE'S REWARD

Sometimes it seems so little
we do as we strive and labor the
long day through, spending our
time in an endless round of
hustle and bustle of work and
sound. Perhaps as we toil we
only see the things that our
efforts have cause to be. A
paper printed—a garment made—
a garden weeded—or colors
weighed. The lowly things of
the brain or hand fashioned and
formed by life's demand. What
do they matter, we often say,—
a little while and they pass
away! Forgotten by all in the
whirl of time, save those who
labored in heat and grime. As
older we grow we clearly see
that these menial tasks were
meant to be, and we feel as only
the aged can, they are part of
life's unchanging plan. The sur-
est test of every one is the way
our tasks have been truly done.
And we'll find the things thought
small and vain, survive for
someone's joy or gain.—B.I.L.L.

TWO WAYS

Mistress: "We are having four
friends to dinner this evening."

Cook: "Yes, ma'am. And how
do you wish it prepared?"

Mistress: "I gave you the
menu. What do you mean?"

Cook: "Well, prepared so's
they'll come again, for in-
stance?"

Tonsil Operations

At an early date I am arrang-
ing to have Dr. Woodcock come to
Raymond for removing tonsils.
Anyone desiring to have tonsils
removed will call at my office and
make arrangements.

We Owe It To Ourselves and To Our Customers

—to have banking relations only
with people of good repute who
are honest and prompt in their
business obligations.

—to make a fair profit on the service we render to
customers so that the bank can grow in strength
and usefulness.

—to make loans with the utmost care and upon
approved security to the end that the funds of the
bank and its depositors will be safely and construc-
tively employed.

It is to the interest of every depositor that we
strictly observe these principles without which
no bank can be strong and permanently helpful.

A Joint Savings Account Is A
Real Convenience

PARTICULARLY as a matter of fam-
ily convenience does the joint account
demonstrate its value. All funds de-
posited are subject to withdrawal at
any time by either of the persons in
whose names the joint account is open-
ed. In case of the decease of one of the
parties holding a joint account all money
may be withdrawn by the other. A
joint savings account in the Standard
Bank is a real convenience where two
people desire access to the same funds.
